# Background

## What?

• A shared and prioritized research agenda and framework for evidenceinformed action to address gender and intersectionality in the global health and intersectoral COVID-19 response

## Why?

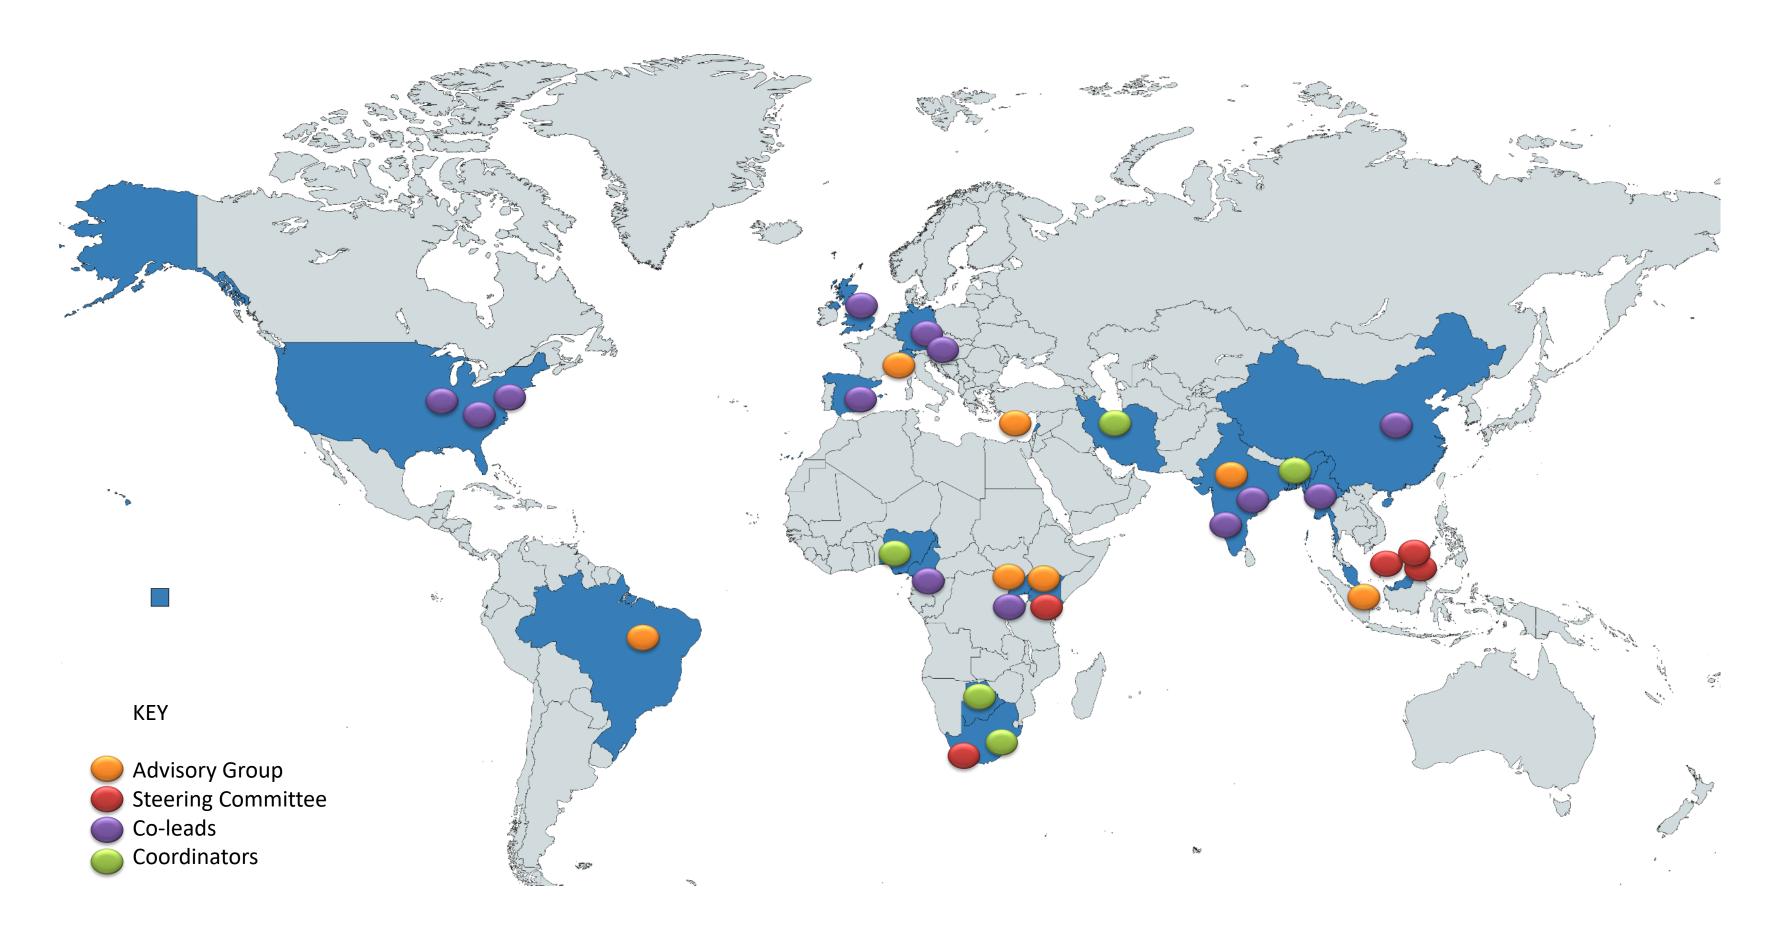

- Provide a systematic and inclusive way to map gender & COVID-19 research to support policy and programming-relevant research and needs accountability
- Facilitate feminist solidarity in understanding, voice, and action from multiple communities of stakeholders

### How?

- In consultation with UN agencies under WHO leadership; WHO R&D Blueprint Gender and COVID-19 working group; SVRI research prioritization; etc
- Open calls for participation following feminist and decolonizing global health principles
