

Gender and Health Research Agenda Setting for COVID-19: Initial Results

Thematic Group 3: Health Service Delivery

How gender influences the inputs, quality and utilisation of health service delivery for covid-19 and non-covid19 health conditions

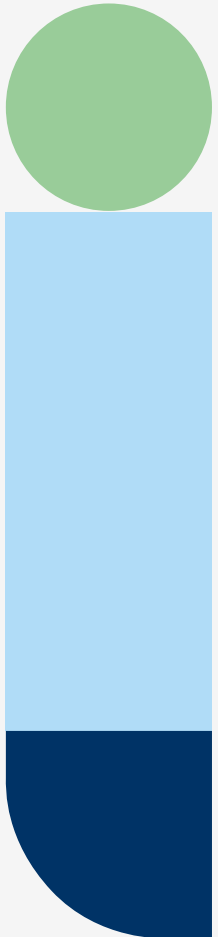

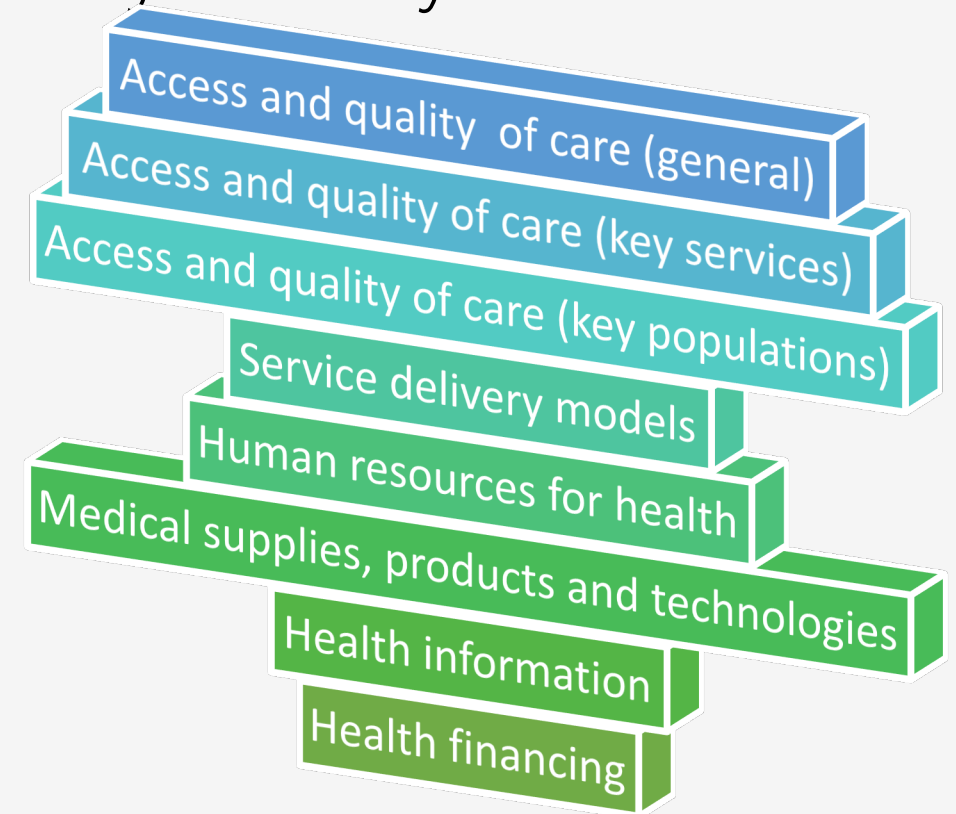

Coordinator: Sedighe Hosseinijebeli (Iran)

Co-leads: Prabha Thangaraj (India), Rosemary Morgan (USA)

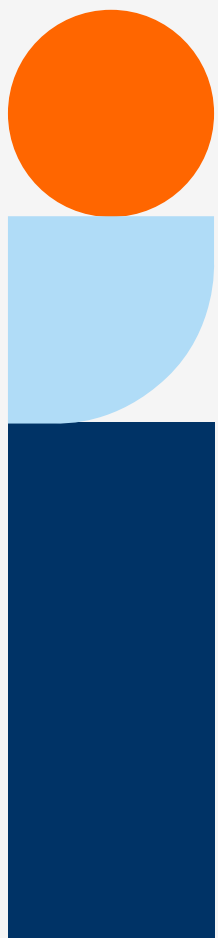

Steering committee focal point: Mamothena Mothupi (South Africa)

Thematic group report process & themes

- 33 contributors across genders, regions, organisations
- 3 evolving drafts between February and May
- 54 research questions
- 8 themes
- 34 current survey responses

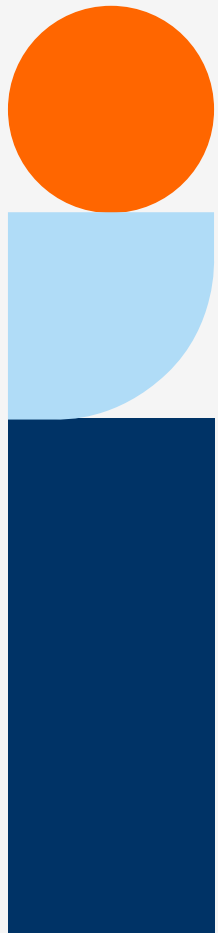

Current thematic top priorities

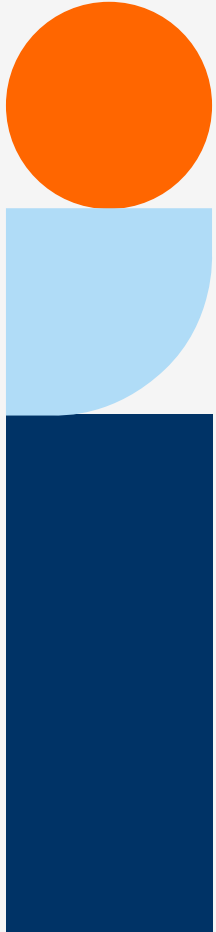

Rank	Research Question	Impact Score	Urgency Score
1	To what extent, and how has, utilization of quality sexual, reproductive and maternal health and violence against women services changed because of COVID-19?	3.62	2.28
2	How did health service delivery measures respond to the needs of pregnant women who tested positive for COVID-19?	3.59	2.43
3	How does access and quality of services for COVID-19 differ by gender and its intersection with other social categories (such as race, disability, migrant status, age, sexuality, etc.) in various contexts?	3.57	2.28
4	What strategies were used to improve gender and other inequities in access and quality of care for COVID-19 services (testing, facility-based care, quarantine care, etc.) and how effective were they?	3.57	2.25

Current thematic top priorities

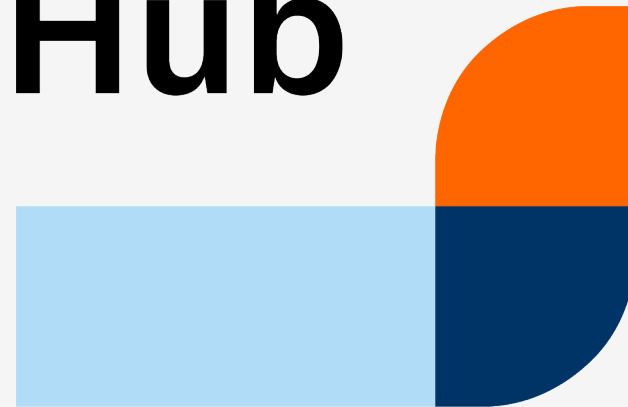

Rank	Research Question	Impact Score	Urgency Score
5	How has the prioritization of COVID-19 services affected access to services for non-COVID-19 health conditions by gender and its intersection with other social categories?	3.57	2.35
6	What is the impact of school closures on access to health services for adolescents by gender across various contexts?	3.47	1.81
7	What are the different service reorganization models implemented to ensure continuity of maternal health, sexual, and reproductive and maternal health (SRHR) and violence against women and girls (VAWG) services during the pandemic, and how effective are they?	3.47	1.73
8	To what extent, and how has, utilization of quality mental health services changed by gender and its intersection with other social categories because of COVID-19?	3.40	2.10

Current thematic top priorities

Rank	Research Question	Impact Score	Urgency Score
9	How has access and quality of care for non-COVID-19 conditions changed by gender and its intersection with other social categories from prior to and during the pandemic?	3.40	2.10
10	What measures are enacted to maintain and safeguard against interruptions in essential health services by gender and its intersection with other social categories?	3.39	2.44
